PROFESSIONAL SUMMARY

Full-Stack Developer with 3 years of experience architecting and delivering enterprise-grade analytics, supply chain, inventory, and healthcare applications. Expert in engineering scalable solutions using React, TypeScript, NestJS, FastAPI, and Azure. Proven track record of translating complex business requirements into high-performance web applications, modernizing legacy systems, and leading frontend architectural initiatives. Recognized leader and mentor, trusted to onboard 20+ engineers monthly, and recipient of 4 Spot Awards for technical ownership, rapid innovation, and business-critical delivery.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Ant Design, Vite

Backend: Node.js, NestJS, FastAPI, RESTful APIs, Python, PySpark

Data & Analytics: SQL, Azure Databricks

Data Visualization & Mapping: D3.js, HighCharts, Chart.js, Leaflet.js, p5.js

Cloud & DevOps: Azure DevOps, CI/CD Pipelines, Bamboo, Bitbucket, GitHub, GitLab

Security & Quality: Microsoft Entra ID (Azure AD), RBAC, OpenID Connect (OIDC), Selenium, SonarQube, Checkmarx

Methodologies: Agile/Scrum, Architecture Design, Technical Code Reviews, Engineering Mentorship

PROFESSIONAL EXPERIENCE

MU SIGMA INC.

Bengaluru, India

Decision Scientist III

January 2026 – Present

- Lead and hands-on full-stack development of core enterprise analytics platforms, establishing standard architectural patterns for business-critical operational monitoring.
- Implemented internationalization (i18n) with support for 20+ languages, including RTL layouts, enabling a scalable multilingual user experience.
- Drive frontend modernization initiatives by engineering a library of reusable, performance-optimized React/TypeScript components, cutting feature delivery timelines for cross-functional teams.
- Collaborate directly with product owners, enterprise architects, and global stakeholders to map abstract business requirements to technical solution blueprints.

Decision Scientist II

January 2025 – December 2025

- Architected high-throughput REST APIs using FastAPI and designed optimized SQL schemas to back real-time data visualization frameworks.
- Secured enterprise applications by implementing robust authentication and Role-Based Access Control (RBAC) schemas via Microsoft Entra ID.
- Automated QA and code-governance workflows using Selenium, integrating automated vulnerability scanning via SonarQube and Checkmarx directly into the development cycle.
- Scale engineering talent by designing and running a structured technical training program, successfully onboarding and mentoring over 20 interns every month through code reviews and architecture walkthroughs.

Decision Scientist I

July 2023 – December 2024

- Built full-stack web applications leveraging React.js, TypeScript, NodeJS and NestJS, focusing on advanced data-dense dashboard layouts.
- Configured and maintained CI/CD pipelines using Azure DevOps, reducing deployment friction and automating environment promotions.
- Contributed technical inputs during analytics platform solution design discussions

KEY PROJECTS

NDC Cockpit | Distribution Center Operations Platform *React, TypeScript, Node.js, Power BI, Microsoft Entra ID*

- Developed a centralized management cockpit enabling operations leaders to monitor logistics KPIs, warehouse throughput, and distribution network health in real time.
- Seamlessly integrated embedded Power BI frameworks with secure OIDC single sign-on authentication.

Supply Chain Resiliency Mapping | Risk & Performance Intelligence *React, TypeScript, Leaflet.js, D3.js, NestJS, SQL*

- Built a highly interactive geospatial analytics portal tracking global supply chain stability and supplier risk factors.
- Leveraged Leaflet.js and D3.js to map real-time location-based disruptions, allowing supply chain managers to perform instant drill-down impact analyses.
- Implemented custom Multi-Factor Authentication (MFA) via Microsoft Entra ID to ensure absolute data isolation.

Materials360 | Warehouse Inventory & Allocation Engine *React, TypeScript, FastAPI, SQL*

- Designed and built an inventory commitment portal reconciling multi-channel customer demand with real-time warehouse availability.
- Created high-concurrency backend workflows to prevent race conditions during bulk inventory allocation and fulfillment execution.

Spark Aligners Performance Dashboard | Healthcare Analytics Platform *React, TypeScript, NestJS, SQL*

- Consolidated disparate clinical, operational, and medical sales datasets into a centralized performance engine for Healthcare Professionals (HCPs).
- Built highly responsive KPI grids utilizing modular visualization charts to expose regional treatment trends and commercial optimization opportunities.

AWARDS & ACHIEVEMENTS

- **4x Corporate Spot Awards (April 2024, November 2024, August 2025, December 2025):** Earned for outstanding technical ownership, rapid prototype delivery, full-stack leadership, and immediate ownership of business-critical features from ideation to production.
- **Multi-Domain Delivery:** Successfully shipped production code across diverse enterprise domains including supply chain risk intelligence, logistics, inventory management, healthcare, and aviation.

EDUCATION & CERTIFICATIONS

Master of Technology (M.Tech) in Cloud Computing

Expected Graduation: 2027

Birla Institute of Technology and Science, Pilani (Work Integrated Learning Programme)

Bachelor of Technology (B.Tech) in Information Technology

Graduated: 2023

Anil Neerukonda Institute of Technology & Sciences

Professional Certifications: Meta Front-End Developer Certificate | IBM Databases and SQL for Data Science (Python)
